

DESIGN RATIONALE

Leadership Portfolio Redesign

From Performance Dashboard to Career Pitch Deck

A human-centered redesign that transforms data into a clear, narrative-driven story of contribution, growth, impact, and future trajectory.

Designed by
Sujal Soni

STORY FIRST

Lead with narrative.
Let data support
the story.

CLEAR & SCANNABLE

Organized into 6 sections
with a natural flow from
summary to future.

GROWTH FOCUSED

Highlight learning,
capability growth, and
career trajectory.

LEARNINGS OVER LIMITS

Frame challenges as
learnings and insights,
not blockers.

PORTABLE & SHAREABLE

A portfolio employees are
proud to share—with
mentors and peers.

Why Redesign the Leadership Portfolio?

The current Leadership Portfolio is built like a dashboard. It presents data, but doesn't communicate a story. Employees see numbers. Mentors don't get the narrative. The portfolio doesn't feel like something an employee would proudly show.

CURRENT PORTFOLIO (DASHBOARD-LIKE)

All metrics have equal weight. No clear narrative. Hard to scan. Hard to tell the story.

WHY THIS IS A PROBLEM

- 1. Data Overload, No Signal**
Too many numbers compete for attention. There's no clear signal of "how did I do?"
- 2. Metrics Without Meaning**
Numbers are shown, but the context behind them is missing. What was I trying to do, and how did I progress?
- 3. Not a Career Narrative**
It doesn't highlight growth, learning, and impact as a journey. It feels like a report, not a portfolio.
- 4. Hard to Share Outside**
Employees wouldn't proudly share this with a mentor or during a career conversation.
- 5. High Effort to Digest**
Takes too long to scan and understand. Should be clear in 3 seconds.

IMPACT ON USERS

Employees

Don't feel a sense of pride or ownership.
Feels like being evaluated, not recognized.

Mentors & Leaders

Need to spend time figuring out the story instead of getting it instantly.

HR & Career Systems

Harder to communicate value, growth, and readiness for the next level.

Organization

Missed opportunity to build a culture of ownership, growth, and visibility.

Key Decisions Behind the Redesign

These decisions were made to transform the Leadership Portfolio from a data-heavy dashboard into a story-driven career pitch deck.

Design Principle

Tell the story first. Use data to prove it, not to overwhelm it.

1 Lead with a Strong Signal

We placed the composite score, status, and level progression at the top as the first thing users see.

Rationale

Users should understand “how did I do?” within 3 seconds. The top section provides that clarity instantly.

Impact

Immediate clarity and confidence. Employees can quickly grasp their overall performance and trajectory.

2 Story Before Data

We added a “My Story This Month” section at the top to set the narrative context before showing numbers.

Rationale

A personal narrative creates connection and meaning. Data becomes supporting evidence, not the main focus.

Impact

Makes the portfolio feel personal, human, and shareable with mentors or peers.

3 Group Related Information

We organized content into 6 clear sections (What I Built, How I Grew, Impact, Challenges, Career Path) instead of scattered cards.

Rationale

Grouping helps users follow a natural flow and reduces cognitive load from jumping across unrelated metrics.

Impact

Improved readability, better flow, and easier scanning.

4 Show Growth, Not Just Results

We highlighted capability growth and career trajectory to show long-term development, not just monthly output.

Rationale

Employees care about growth and future opportunities as much as current performance. This strengthens motivation.

Impact

Encourages a growth mindset and reinforces a sense of progress and direction.

5 Frame Challenges as Learnings

We reframed constraints as learnings and insights instead of negative blockers. Visual design is positive and neutral.

Rationale

Constraints are a reality of execution. Framing them positively promotes ownership and continuous improvement.

Impact

Creates a safe, constructive tone and reduces defensiveness.

Outcome

The redesigned portfolio is clear, narrative-driven, growth-focused, and shareable—turning performance data into a career story employees are proud to present.

Challenges Addressed in the Redesign

The redesign directly tackles the five key challenges identified in the current Leadership Portfolio. Here's how each challenge is addressed in the new design.

CHALLENGE	HOW WE ADDRESSED IT	DESIGN CHOICES	IMPACT
 1. Data Overload, No Signal Too many numbers compete for attention. No clear signal of "how did I do?"	 Created a strong top signal with composite score, status, and level progression to answer "how did I do?" within 3 seconds.	 • Hero section with score & status • Large typography for key signal • Minimal metrics in the first view	 Instant Clarity Users immediately understand their performance and trajectory.
 2. Metrics Without Meaning Numbers are shown, but the context behind them is missing. What was I trying to do, and how did I progress?	 Added "My Story This Month" and contextual sections before metrics so numbers are always connected to purpose and progress.	 • "My Story This Month" section • Context before data • Explanatory microcopy	 Meaningful Understanding Numbers now make sense because the context is clear.
 3. Not a Career Narrative Doesn't highlight growth, learning, and impact as a journey. Feels like a report, not a portfolio.	 Structured the portfolio as a journey — contributions, growth, impact, learnings, and career trajectory. Story before numbers.	 • 6-section narrative structure • Growth & career progression • Learnings framed positively	 Career Focused Employees see their growth journey, not just monthly outputs.
 4. Hard to Share Outside Employees wouldn't proudly share this with a mentor or during a career conversation.	 Designed with a clean, narrative-first layout that is easy to understand outside the company and something employees can proudly share.	 • Clean, modern, presentation-style visuals • Plain language and simple labels • Portable and mentor-friendly	 Proud to Share Feels like a professional portfolio, not an internal report.
 5. High Effort to Digest Takes too long to scan and understand. Should be clear in 3 seconds.	 Simplified the layout, grouped related information, used clear hierarchy, and surfaced what matters most. Everything is scannable.	 • Clear visual hierarchy • Smart use of whitespace • Progressive disclosure for secondary details	 Easy & Fast to Digest Can be understood in seconds, not minutes.

Result

The redesigned Leadership Portfolio transforms data into a story—clear, meaningful, and motivating. It helps employees reflect, helps mentors understand, and helps the organization build a culture of ownership and growth.

Our Solution: A Career Pitch Deck, Not a Dashboard

The redesigned Leadership Portfolio transforms performance data into a clear, narrative-driven story of contributions, growth, impact, and future trajectory.

Design Concept

Turn the Leadership Portfolio into a personal career pitch deck that employees are proud to share. Story first. Data as evidence. Growth always visible.

Design Principles

Story First

Lead with narrative. Help users understand their month before looking at the numbers.

Clarity in 3 Seconds

Top section answers "How did I do?" instantly with the strongest signals.

Organized & Scannable

Information is grouped into 6 clear sections with a natural flow from summary to future.

Growth Mindset

Highlight growth, learning, and progress—not just results. Make it motivating, not judgmental.

Portable & Shareable

Clean, professional, and easy to understand outside the organization. A portfolio, not a report.

Leadership Portfolio

March 2026

UID: LP-2026-03-001

Strong Delivery Month

Rajan shipped meaningful work, improved capability across key areas, and stayed on track for the next leadership level.

Status

1

My Story This Month

This month reflects strong execution and steady growth. I completed most planned deliverables, contributed original knowledge work, and showed consistent engagement in daily operating rituals.

A few blockers slowed execution, but most constraints were resolved with clear follow-up.

2

What I Built

42

Deliverables Completed

14

Knowledge Contributions

Key Highlights

- ✓ Curriculum mapping matrix delivered
- ✓ Production planning workflow improved
- ✓ Assessment framework contribution completed
- ✓ Review-ready work moved through QA

3

How I Grew

Delivery		78%
Knowledge Contribution		72%
Framework Usage		68%
Process Adoption		81%
Engagement		86%

Growth was strongest in process adoption and engagement, with framework usage as the next improvement area.

4

Business Impact

8 KPI Commitments

6

Targets Met

1

Partial

1

Missed

0

Awaiting Review

Key outcomes contributed to quality, timeliness, and operational efficiency.

5

Challenges & Learnings

8

Constraints Raised

6

Resolved

Most Common

- Budget
- Internal Support
- Permissions

Constraints are shown as learning signals. They highlight where execution needs support, not where blame should be placed.

What This Delivers

Employees feel proud to share their portfolio.

Mentors get the story, not just the numbers.

Growth and learning are always visible.

Creates a culture of ownership, transparency, and progress.

Thank You!

Thank you for the opportunity to reimagine the Leadership Portfolio.
This redesign is built to inspire pride, drive growth,
and spark meaningful conversations.

What This Redesign Delivers

Empowers Employees

A portfolio they are proud
to own and share.

Helps Mentors

A clear story to understand
impact and potential.

Drives Growth

Growth, learning, and trajectory
are always visible.

Builds Ownership

Focus shifts from reporting
to responsibility.

Strengthens Organization

Creates a culture of transparency,
progress, and recognition.

“

From data to story. From reporting to growth.
From a dashboard to a career journey.
